OBJECTIVE

Full-time employment in computer hardware or software after graduation in May 2027.

EDUCATION

University of Wisconsin-Madison

Bachelor of Science, Computer Engineering, Computer Science *Expected May 2027*
GPA: 3.4/4.0, Dean's Honor List 2 semesters

AWARDS & HONORS

Eagle Scout, Boy Scouts of America, Troop 865, Mequon, Wisconsin

- Inducted into the Order of the Arrow for exemplary leadership and service
- Earned 33 merit badges and 2 Eagle Palms for continued involvement after attaining Eagle rank

Scholarships: Kohler Co. Scholar, Frank Family Scholar, National Honor Society

EXPERIENCE

Industrial Refrigeration Consortium, University of Wisconsin-Madison

Student Web Developer & Information Technology Administrator *May 2026-present*

- Developed and maintained web-based engineering applications using a Linux, Apache, MySQL, PHP (LAMP) stack
- Modernized the Charge Management Tool by removing redundant code, migrating to JSON storage, and maintaining compatibility with existing project files
- Enhanced the Safety Relief Vent Tool by implementing an equipment duplication feature, significantly improving user productivity and reducing repetitive data-entry tasks
- Identified and remediated a security vulnerability that could have enabled session theft, strengthening the security of web applications and user data
- Introduced Git-based version control workflows to improve code management, change tracking, and maintainability across multiple applications
- Administered website and database infrastructure, including successful restoration of critical services from backups following an accidental website deletion

Village of Germantown, Wisconsin

Engineering Intern *May 2024-August 2024, May 2025-August 2025*

- Operated GPS land surveying equipment and performed routine erosion control inspections
- Trained new team members in erosion control methods and inspection
- Organized and digitized historical engineering records to improve departmental efficiency

City of Mequon, Wisconsin

Engineering Intern *May 2022-August 2022, May 2023-August 2023*

- Utilized GIS software to map and update underground utility data
- Operated land surveying GPS equipment and assisted with field data collection
- Conducted inspections of road construction projects and performed routine erosion control checks

EXTRACURRICULARS

Assistant Treasurer and Computer Chair, Kappa Eta Kappa, Professional Engineering Fraternity

- Authored and submitted a $1,500 funding proposal to the alumni association for new computer equipment
- Delivered a technical talk to a 50-member audience on Pi-hole, explaining its use in network-based ad blocking
- Supported budget development, financial organization, and income/expense tracking
- Presented a budget overview to the membership detailing chapter income and expenses

SKILLS

Programming Languages: Java, C/C++, Python, Bash, HTML, CSS, JavaScript, MATLAB, Assembly
CAD Tools: SystemVerilog/VHDL, Siemens Questa, Synopsys, AutoCAD, ArcGIS, UltiMaker Cura, SPICE
Shop Tools: 3D Printing, Soldering, Oscilloscope
Computer Hardware/Software: Raspberry Pi, Arduino, Microsoft Windows, Microsoft Office, Linux, SQL Databases
